

☒ Easy Level (10 MCQs)

1.

Which protocol does Samba use?

- A) FTP
- B) SSH
- C) SMB/CIFS
- D) NFS

Ans: C

2.

Which service dynamically assigns IP addresses?

- A) DNS
- B) DHCP
- C) FTP
- D) HTTP

Ans: B

3.

What is the default Samba configuration file?

- A) /etc/smbd.conf
- B) /etc/samba/smb.conf
- C) /etc/samba.conf
- D) /smb/etc/conf

Ans: B

4.

Which command installs Samba in Ubuntu?

- A) apt-get samba

- B) install samba-server
- C) apt install samba
- D) apt-get smb

Ans: C

5.

What is the DHCP config file path on Ubuntu?

- A) /etc/dhcpd.conf
- B) /etc/dhcp/dhcpd.conf
- C) /etc/network/dhcp.conf
- D) /etc/dhcp.conf

Ans: B

6.

What is the main role of a DHCP server?

- A) Resolves domain names
- B) Assigns IP addresses
- C) Secures network
- D) Hosts web apps

Ans: B

7.

Which Samba command adds a user?

- A) adduser samba
- B) smbpasswd -a username
- C) samba-add user
- D) usermod -S

Ans: B

8.

Which port does DHCP use?

- A) 22
- B) 67
- C) 21
- D) 25

Ans: B

9.

Which tool shows active DHCP leases?

- A) dhcp-show
- B) systemctl status dhcp
- C) cat /var/lib/dhcp/dhcpd.leases
- D) ip dhcp

Ans: C

10.

Samba shares can be accessed in Windows using:

- A) HTTP
- B) \<IP><sharename>
- C) FTP
- D) NFS://

Ans: B

☒ Medium Level (20 MCQs)

11.

What is the Samba daemon name?

- A) smbd
- B) smbserver
- C) samba
- D) smbclient

Ans: A

12.

Which file does Samba log authentication events to?

- A) /var/log/auth.log
- B) /var/log/samba/log.smbd
- C) /var/log/syslog
- D) /var/log/ftp.log

Ans: B

13.

Which interface must be defined for DHCP server in Ubuntu?

- A) eth0.conf
- B) /etc/default/isc-dhcp-server
- C) /etc/dhcp/interface.conf
- D) /etc/network/interfaces

Ans: B

14.

What does the 'range' directive do in DHCP config?

- A) Defines IP to skip
- B) Defines static IPs
- C) Defines IP range for clients

D) Sets firewall rules

Ans: C

15.

How do you manually test DHCP lease?

A) ping gateway

B) restart network

C) dhclient

D) dhcp-get

Ans: C

16.

What is the Samba protocol mainly used for?

A) Printing only

B) GUI interface

C) File and print sharing

D) Web browsing

Ans: C

17.

Which command restarts the DHCP service?

A) service dhcp start

B) systemctl restart isc-dhcp-server

C) dhcpd-restart

D) dhcpctl

Ans: B

18.

Which port does SMB commonly use?

- A) 21
- B) 22
- C) 139 and 445
- D) 443

Ans: C

19.

What does 'guest ok = yes' do in Samba?

- A) Disables password login
- B) Allows guest access without user login
- C) Locks guest
- D) Redirects FTP

Ans: B

20.

Which command displays active Samba shares?

- A) smbstatus
- B) samba-shares
- C) smbshow
- D) net view

Ans: A

21.

Which file stores DHCP lease information?

- A) /var/dhcp/leases.txt
- B) /var/lib/dhcp/dhcpd.leases
- C) /etc/leases
- D) /etc/dhcp/leases.db

Ans: B

22.

What is the use of 'option routers' in DHCP?

- A) Specifies domain
- B) Sets default gateway
- C) Enables DNS
- D) Blocks unknown users

Ans: B

23.

What is required to share a folder over Samba?

- A) Just chown
- B) Configure share in smb.conf
- C) Enable httpd
- D) Format disk

Ans: B

24.

To allow Samba through firewall, you must:

- A) Enable Samba service in UFW or firewalld
- B) Disable firewall
- C) Open HTTP
- D) Allow port 8080

Ans: A

25.

Which line enables write access to Samba share?

- A) write = yes
- B) access = rw
- C) write_enable = YES

D) read only = no

Ans: D

26.

How do you assign a static IP using DHCP config?

A) static-bind

B) host block with MAC address

C) assign-fixed=yes

D) ipstatic

Ans: B

27.

Which tool lists remote Samba shares?

A) showmount

B) smbclient -L <IP>

C) ping

D) smblist

Ans: B

28.

How to reload Samba configuration without restarting the service?

A) killall smbd

B) smb reload

C) smbcontrol smbd reload-config

D) reloadsmb

Ans: C

29.

Which field in DHCP defines DNS server?

- A) option dns
- B) option name-server
- C) option domain-name-servers
- D) dns-server

Ans: C

30.

Which DNS record is typically updated with DHCP + DDNS?

- A) MX
- B) PTR and A
- C) CNAME
- D) NS

Ans: B

☒ Hard Level (10 MCQs)

31.

What does the parameter 'security = user' do in Samba?

- A) Disables passwords
- B) Enables anonymous login
- C) Requires user authentication
- D) Forces admin login

Ans: C

32.

Which command lists Samba users?

- A) smbuser -l
- B) pdbedit -L
- C) smbpasswd -L
- D) usermod -s

Ans: B

33.

Which config parameter restricts access to a Samba share?

- A) read only
- B) valid users
- C) auth filter
- D) share secure

Ans: B

34.

What causes IP conflicts in DHCP?

- A) Too many clients
- B) Overlapping ranges
- C) Incorrect DNS
- D) MAC spoofing

Ans: B

35.

How do you enable dynamic DNS updates with DHCP?

- A) Use ddns-update-style interim
- B) enable-dns=yes
- C) dynamicdns=active
- D) ddns true

Ans: A

36.

Which Samba utility maps users to groups?

- A) smbmap
- B) net groupmap
- C) smbusers
- D) smbgroups

Ans: B

37.

Which protocol helps SMB with NetBIOS name resolution?

- A) NTP
- B) WINS
- C) LDAP
- D) NFS

Ans: B

38.

Which command views SMB shares mounted locally?

- A) mount -t smbfs
- B) smbfs
- C) df -h | grep smb
- D) smbstat

Ans: C

39.

Which DHCP option allows booting from a network?

- A) next-server
- B) bootp
- C) option bootfile-name

D) Both A and C

Ans: D

40.

Which security setting disables anonymous access in Samba?

A) guest ok = no

B) security = user

C) valid users = <user>

D) All of the above

Ans: D
