- A) www-data or apache
- B) root
- C) hostadmin
- D) apacheadmin

Ans: A

30.

What module in Apache handles URL rewriting?

- A) mod_url
- B) mod_path
- C) mod_rewrite
- D) mod_redirect

Ans: C

☒ Hard Level (10 MCQs)

31.

How to test Apache config for syntax errors?

- A) apachectl -t
- B) systemctl test apache2
- C) httpd.conf -check
- D) apache-test

Ans: A

32.

Which command clears Squid cache?

- A) squid -clean
- B) rm -rf /var/spool/squid/* && squid -z
- C) squid -flush
- D) reset-squid

Ans: B

33.

What directive is needed for name-based virtual hosting?

- A) NameHost *
- B) VirtualName *
- C) NameVirtualHost *:80
- D) HostnameVirtual *

Ans: C

34.

How do you create the cache directory structure in Squid?

- A) squid -z
- B) squid -init
- C) squid -cache
- D) squid -start

Ans: A

35.

To block YouTube in Squid, which method is best?

- A) IP block
- B) ACL using dstdomain
- C) SSL inspection
- D) DNS blocking

Ans: B

36.

How can Apache be protected from DoS?

- A) LimitRequestBody
- B) mod_security
- C) KeepAliveTimeout
- D) All of the above

Ans: D

37.

What is squidGuard?

- A) Apache plugin
- B) Squid log viewer
- C) Content filtering add-on for Squid
- D) Cache manager

Ans: C

38.

How does Squid improve performance?

- A) Uses load balancing
- B) Offloads SSL
- C) Caches web content
- D) Blocks non-HTTP traffic

Ans: C

39.

Which directive is used to configure multiple domains on Apache server?

- A) ServerAlias
- B) HostMatch
- C) AliasDomain

D) MultiHost

Ans: A

40.

Which tool encrypts communication with Apache?

A) mod_ssl

B) mod_crypt

C) mod_secure

D) ssl-gen

Ans: A
