

☒ Easy Level (10 MCQs)

1.

IPv4 addresses are composed of how many bits?

- A) 8
- B) 16
- C) 32
- D) 128

Ans: C

2.

IPv6 provides how many bits for addressing?

- A) 32
- B) 64
- C) 128
- D) 256

Ans: C

3.

Which command is used to login remotely using SSH?

- A) rlogin
- B) telnet
- C) ssh
- D) ftp

Ans: C

4.

What is the default port for SSH?

- A) 22

- B) 21
- C) 80
- D) 443

Ans: A

5.

Which protocol does VNC use?

- A) HTTP
- B) RDP
- C) Remote Framebuffer Protocol (RFB)
- D) SSH

Ans: C

6.

What is the loopback address in IPv6?

- A) 127.0.0.1
- B) ::1
- C) ::0
- D) 0.0.0.0

Ans: B

7.

Which port is used by VNC display :1?

- A) 5800
- B) 5901
- C) 22
- D) 443

Ans: B

8.

Which command is used to generate SSH keys?

- A) ssh-create
- B) ssh-key
- C) sshgen
- D) ssh-keygen

Ans: D

9.

Which command securely copies files between systems?

- A) ftp
- B) scp
- C) copy
- D) rcp

Ans: B

10.

Which protocol is commonly used for directory-based authentication?

- A) FTP
- B) LDAP
- C) DNS
- D) SMTP

Ans: B

☒ Medium Level (20 MCQs)

11.

What type of IPv6 address starts with fe80::/10?

- A) Global Unicast
- B) Multicast
- C) Link-local
- D) Anycast

Ans: C

12.

Which tool is used to connect to a remote desktop via GUI?

- A) ssh
- B) sftp
- C) VNC Viewer
- D) RADIUS

Ans: C

13.

Which address type in IPv6 is equivalent to broadcasting in IPv4?

- A) Multicast
- B) Anycast
- C) Unicast
- D) Localhost

Ans: A

14.

What is the main difference between SSH and Telnet?

- A) SSH is faster
- B) SSH is encrypted
- C) Telnet is graphical

D) SSH uses TCP, Telnet does not

Ans: B

15.

To access VNC securely, what should you use?

A) FTP

B) Telnet

C) SSH Tunnel

D) SCP

Ans: C

16.

How to forward VNC port via SSH?

A) `ssh -R 5901`

B) `ssh -L 5901:localhost:5901 user@host`

C) `ssh -P 5901`

D) `ssh-tunnel`

Ans: B

17.

In OpenSSH, the daemon that listens for connections is:

A) `ssh`

B) `ssh-server`

C) `sshd`

D) `sshstart`

Ans: C

18.

What does `scp file user@host:/tmp/` do?

- A) Downloads file from server
- B) Copies file to server's /tmp/ directory
- C) Deletes file remotely
- D) Opens a GUI

Ans: B

19.

Which authentication protocol uses time-based tickets?

- A) LDAP
- B) Kerberos
- C) RADIUS
- D) SSH

Ans: B

20.

To connect via VNC to port 5901, you should use display:

- A) :0
- B) :1
- C) :5901
- D) :22

Ans: B

21.

The file used to configure SSH daemon is:

- A) ~/.ssh/config
- B) /etc/sshd.conf
- C) /etc/ssh/sshd_config
- D) /var/ssh.conf

Ans: C

22.

Which Linux daemon provides local caching for authentication?

- A) PAM
- B) SSSD
- C) SSH
- D) DNS

Ans: B

23.

Which command allows file transfer using SSH session?

- A) vncserver
- B) ftp
- C) sftp
- D) rsync

Ans: C

24.

Which IPv4 address is private?

- A) 8.8.8.8
- B) 192.168.1.1
- C) 172.0.0.1
- D) 11.0.0.1

Ans: B

25.

Which protocol is best suited for remote login with encryption?

- A) Telnet
- B) SSH
- C) FTP

D) HTTP

Ans: B

26.

Which address type in IPv6 is sent to the nearest server in routing?

A) Multicast

B) Unicast

C) Broadcast

D) Anycast

Ans: D

27.

How many bits are in a single hexadecimal digit in IPv6?

A) 4

B) 8

C) 16

D) 32

Ans: A

28.

Which file contains PAM module configs?

A) /etc/shadow

B) /etc/pam.d/

C) /etc/auth.conf

D) /etc/pw.d/

Ans: B

29.

What is the primary goal of SSSD in Linux systems?

- A) Speed up SSH
- B) Manage storage
- C) Centralize authentication
- D) Manage packages

Ans: C

30.

Which IPv6 address type can be used for one-to-one communication?

- A) Multicast
- B) Unicast
- C) Anycast
- D) Link-local

Ans: B

☒ Hard Level (10 MCQs)

31.

Which of the following is NOT true about IPv6?

- A) Supports NAT
- B) Supports auto-configuration
- C) Has larger address space
- D) Uses colon-separated hex format

Ans: A

32.

What is the main benefit of using Kerberos authentication?

- A) Peer-to-peer transfer
- B) Password reuse
- C) Ticket-based authentication without resending passwords
- D) Faster GUI

Ans: C

33.

Which command creates SSH keys using ED25519 algorithm?

- A) ssh-keygen -t rsa
- B) ssh-keygen -t dsa
- C) ssh-keygen -t ed25519
- D) ssh-keygen -e

Ans: C

34.

To restrict VNC to local access only, which option is used?

- A) -restrict
- B) -localhost
- C) -internal
- D) -local

Ans: B

35.

What is required to connect Linux to a central LDAP system?

- A) Samba
- B) PAM + NSS
- C) FTP
- D) DHCP

Ans: B

36.

What port number does SFTP use?

- A) 21
- B) 22
- C) 23
- D) 25

Ans: B

37.

Which IPv6 address is used for all-nodes multicast?

- A) ff00::1
- B) ff02::1
- C) ff02::2
- D) ::1

Ans: B

38.

Which option ensures SSH never accepts passwords?

- A) PasswordAuthentication no
- B) PermitRootLogin yes
- C) AllowUsers all
- D) DisableAuth

Ans: A

39.

In VNC, to serve display :3, which port is used?

- A) 5903
- B) 6003
- C) 22

D) 5000

Ans: A

40.

Which of the following best describes PAM in Linux?

A) Remote login manager

B) Secure file manager

C) Authentication framework

D) Hardware configuration tool

Ans: C
