

☒ Easy Level (10 MCQs)

1.

Which service is used to manage printing in Linux?

- A) Samba
- B) NFS
- C) CUPS
- D) LPD

Ans: C

2.

Which command prints a file in Linux?

- A) pr
- B) print
- C) lp
- D) pstree

Ans: C

3.

What file stores DNS resolver IPs?

- A) /etc/hosts
- B) /etc/resolv.conf
- C) /etc/nsswitch.conf
- D) /etc/dns.conf

Ans: B

4.

Which command shows network interfaces in modern Linux?

- A) netstat

- B) ip a
- C) route
- D) lsnet

Ans: B

5.

Which command starts a service in systemd?

- A) service start
- B) systemd start
- C) systemctl start
- D) sysinit start

Ans: C

6.

What is the port used by CUPS web interface?

- A) 515
- B) 80
- C) 631
- D) 25

Ans: C

7.

Which command shows the print queue?

- A) queue
- B) lpq
- C) jobs
- D) lpr

Ans: B

8.

Which file maps hostnames to IP addresses?

- A) /etc/hostname
- B) /etc/networks
- C) /etc/hosts
- D) /etc/domain

Ans: C

9.

What is the default print command in Linux?

- A) lpd
- B) cat
- C) lp
- D) print

Ans: C

10.

Which systemd command enables service at boot?

- A) systemctl enable
- B) systemctl autostart
- C) systemctl boot
- D) systemd enable

Ans: A

☒ **Medium Level (20 MCQs)**

11.

Which file is used to auto-mount file systems?

- A) /etc/hosts
- B) /etc/fstab
- C) /etc/crontab
- D) /etc/mounts

Ans: B

12.

What does the command `systemctl daemon-reload` do?

- A) Reboots the system
- B) Reloads all services
- C) Reloads systemd manager configuration
- D) Reinstalls services

Ans: C

13.

Which protocol does CUPS use for print communication?

- A) FTP
- B) NFS
- C) IPP
- D) SMB

Ans: C

14.

Which of the following can be used to configure network interfaces on Red Hat systems?

- A) /etc/network/interfaces
- B) /etc/resolv.conf
- C) /etc/sysconfig/network-scripts/ifcfg-*

D) /etc/ip.conf

Ans: C

15.

To stop a service in systemd:

A) service stop

B) systemctl down

C) systemctl stop

D) systemd stop

Ans: C

16.

To change the hostname temporarily:

A) edit /etc/hostname

B) edit /etc/hosts

C) hostnamectl set-hostname

D) hostname <newname>

Ans: D

17.

Which command lists all available services in systemd?

A) systemctl list

B) systemctl status

C) systemctl list-units --type=service

D) service --all

Ans: C

18.

Which configuration file defines kernel-level settings?

- A) /etc/sysctl.conf
- B) /etc/kernel.conf
- C) /etc/sysconfig.conf
- D) /etc/init.conf

Ans: A

19.

To change the DNS nameserver, you edit:

- A) /etc/sysctl.conf
- B) /etc/hostname
- C) /etc/resolv.conf
- D) /etc/fstab

Ans: C

20.

Which Linux component provides a GUI for CUPS?

- A) Gnome Print
- B) PrintManager
- C) CUPS Web Interface
- D) PrinterX

Ans: C

21.

Which protocol is used by Samba for printer sharing?

- A) SMB
- B) LPD
- C) FTP
- D) SNMP

Ans: A

22.

To cancel a print job with job ID 3:

- A) cancel 3
- B) lpq 3
- C) lpr -c 3
- D) cupsdel 3

Ans: A

23.

Which command shows if a service is enabled at boot?

- A) systemctl status
- B) systemctl list-unit-files
- C) systemctl --enabled
- D) chkconfig

Ans: B

24.

To check if your system supports systemd:

- A) ps -p 1
- B) systemctl --version
- C) pidof init
- D) All of the above

Ans: D

25.

Which config file defines cron jobs?

- A) /etc/cronjob
- B) /etc/crontab
- C) /etc/tasks

D) /etc/cron.conf

Ans: B

26.

Which of these is NOT a valid system configuration file?

A) /etc/shadow

B) /etc/resolv.conf

C) /etc/logs.conf

D) /etc/fstab

Ans: C

27.

CUPS uses which daemon?

A) cupsadmin

B) cupsd

C) printd

D) lpadmin

Ans: B

28.

Which file contains encrypted passwords?

A) /etc/passwd

B) /etc/shadow

C) /etc/secure

D) /etc/login.defs

Ans: B

29.

Which command tests hostname resolution?

- A) host
- B) nslookup
- C) ping hostname
- D) All of the above

Ans: D

30.

Which system file controls default mount behavior?

- A) /etc/sysctl.conf
- B) /etc/fstab
- C) /etc/profile
- D) /etc/resolve.conf

Ans: B

☒ Hard Level (10 MCQs)

31.

Which file controls startup targets in systemd?

- A) /etc/systemd/targets
- B) /lib/systemd/system/default.target
- C) /etc/systemd/system/default.target
- D) /etc/init.d/default

Ans: C

32.

Which command enables IP forwarding persistently?

- A) sysctl -p
- B) echo 1 > /proc/sys/net/ipv4/ip_forward
- C) echo "net.ipv4.ip_forward=1" >> /etc/sysctl.conf
- D) All of the above

Ans: D

33.

What does lpstat -t show?

- A) All print jobs
- B) Status of all printers
- C) Printer and system status
- D) Print log

Ans: C

34.

What does systemctl mask do?

- A) Hides a service
- B) Disables service and prevents manual start
- C) Enables service
- D) Encrypts the service

Ans: B

35.

In systemd, which runlevel does multi-user.target correspond to?

- A) 1
- B) 3
- C) 5
- D) 6

Ans: B

36.

To reload cupsd without restart:

- A) kill -HUP cupsd
- B) systemctl reload cups
- C) cupsctl reload
- D) service cups reload

Ans: B

37.

How do you view which files a systemd service reads?

- A) journalctl
- B) strace
- C) systemd-analyze
- D) systemctl show -p FragmentPath

Ans: D

38.

Which system file configures default shell for users?

- A) /etc/passwd
- B) /etc/shadow
- C) /etc/shells
- D) /etc/profile

Ans: A

39.

Which print protocol allows encryption and authentication?

- A) LPD
- B) IPP over HTTPS
- C) SMB

D) RAW

Ans: B

40.

Which file controls the default DNS resolver order?

A) /etc/dns.conf

B) /etc/nsswitch.conf

C) /etc/resolv.conf

D) /etc/lookup.conf

Ans: B
