

☒ EASY (10 Questions)

1. What does WDS stand for?

- A. Windows Device Setup
- B. Windows Deployment Services ☒
- C. Windows Debugging System
- D. Windows Development Suite

☒ **Answer:** B

Explanation: WDS stands for Windows Deployment Services, used for network OS deployment.

2. Which protocol does WDS use to boot clients over the network?

- A. FTP
- B. PXE ☒
- C. HTTP
- D. SMTP

☒ **Answer:** B

Explanation: PXE (Preboot Execution Environment) is the network boot protocol used.

3. What type of image file does WDS deploy?

- A. .exe
- B. .wim ☒
- C. .iso
- D. .dll

☒ **Answer:** B

Explanation: WDS uses Windows Imaging Format (.wim) files.

4. Which Windows Server role must be installed for WDS?

- A. DNS Server
- B. DHCP Server
- C. Windows Deployment Services ☒

D. File Server

☒ **Answer: C**

Explanation: WDS must be installed as a server role on Windows Server.

5. What OS component is used as a boot image in WDS?

- A. Windows PE ☒
- B. Windows Server
- C. Windows Recovery
- D. Windows Update

☒ **Answer: A**

Explanation: Windows Preinstallation Environment (Windows PE) is used as boot image.

6. Which service is typically required alongside WDS for IP assignment?

- A. DHCP ☒

- B. FTP
- C. DNS
- D. HTTP

☒ **Answer:** A

Explanation: DHCP is required to assign IP addresses during network boot.

7. WDS can deploy images to clients that:

- A. Boot from DVD only
- B. Boot via USB only
- C. Boot via network (PXE) ☒
- D. Boot only in safe mode

☒ **Answer:** C

Explanation: WDS deploys OS images via PXE network boot.

8. Which Microsoft tool is used to create unattended installation answer files for

WDS?

- A. Sysprep
- B. DISM
- C. Windows SIM ☒
- D. Notepad

☒ **Answer:** C

Explanation: Windows System Image Manager (SIM) creates unattended answer files.

9. Which file format is used to capture a reference Windows installation?

- A. .exe
- B. .wim ☒
- C. .bat
- D. .dll

☒ **Answer:** B

Explanation: Reference machines are captured into .wim files.

10. WDS is typically used in:

- A. Small home networks
- B. Large-scale OS deployments ☒
- C. Web hosting
- D. Gaming servers

☒ **Answer:** B

Explanation: WDS is designed for enterprise scale OS deployments.

☒ **MEDIUM (20 Questions)**

11. What is the role of the boot image in WDS?

- A. Contains the OS to install
- B. Used to boot client machines into Windows PE ☒
- C. Stores user profiles
- D. Manages DHCP leases

☒ **Answer:** B

Explanation: The boot image boots clients into Windows PE environment.

12. What must a computer support to boot from a WDS server?

- A. USB boot
- B. PXE boot ☒
- C. Network file share
- D. BIOS only

☒ **Answer:** B

Explanation: PXE boot support is required to boot from WDS.

13. What is multicast deployment in WDS?

- A. Deploying to one computer
- B. Deploying to many computers simultaneously ☒

- C. Deploying only to servers
- D. Deploying over USB

☒ **Answer:** B

Explanation: Multicast sends one stream to many clients to save bandwidth.

14. Which of these is NOT a requirement for installing WDS?

- A. Active Directory Domain Services
- B. DHCP Server
- C. DNS Server
- D. SQL Server ☒

☒ **Answer:** D

Explanation: SQL Server is not required for WDS.

15. How are images organized in WDS?

- A. By server name
- B. Into Image Groups ☒
- C. Alphabetically only
- D. By date

☒ **Answer:** B

Explanation: Images are grouped logically into Image Groups.

16. Which tool is used to capture a Windows image to deploy via WDS?

- A. DISM ☒
- B. Regedit
- C. PowerShell ISE
- D. MMC

☒ **Answer:** A

Explanation: DISM captures and manages Windows images.

17. Which of the following is a WDS deployment mode?

- A. Unattended installation ☒
- B. Manual installation only
- C. USB cloning
- D. FTP boot

☒ **Answer:** A

Explanation: WDS supports unattended installations using answer files.

18. What type of partition is required on the WDS server to store images?

- A. FAT32
- B. NTFS ☒
- C. exFAT
- D. ReFS

☒ **Answer:** B

Explanation: WDS requires NTFS partitions for storing images.

19. What does Sysprep do in the deployment process?

- A. Installs drivers
- B. Prepares a Windows image for deployment by removing unique info ☒
- C. Compresses images
- D. Creates a PXE boot server

☒ **Answer:** B

Explanation: Sysprep removes unique identifiers to generalize the image.

20. Which port does WDS use for TFTP during PXE boot?

- A. 80
- B. 69 ☒
- C. 443
- D. 3389

☒ **Answer:** B

Explanation: TFTP uses UDP port 69 for transferring boot files.

21. Can WDS deploy operating systems to computers not joined to a domain?

- A. Yes ☒
- B. No

☒ Answer: A

Explanation: WDS can deploy to non-domain joined machines, but some features may require domain membership.

22. What Windows Server feature is integrated with WDS for group policy enforcement?

- A. DHCP
- B. Active Directory ☒
- C. File Server Resource Manager
- D. IIS

☒ Answer: B

Explanation: WDS integrates with AD for access control and deployment policies.

23. Which WDS deployment method minimizes network bandwidth usage?

- A. Unicast
- B. Multicast ☒
- C. Manual install
- D. FTP

☒ **Answer:** B

Explanation: Multicast sends a single stream to multiple clients simultaneously.

24. How do you add an install image to WDS?

- A. Through the WDS Management Console ☒
- B. By copying files manually
- C. Using regedit
- D. Via DHCP console

☒ **Answer:** A

Explanation: Install images are added through the WDS MMC.

25. What is a discover image in WDS?

- A. An image to boot PXE-capable clients
- B. An image to boot non-PXE clients ☒
- C. The Windows installation image
- D. The backup image

☒ **Answer:** B

Explanation: Discover images allow non-PXE clients to boot and start deployment.

26. Which WDS component manages the image repository?

- A. DHCP Server
- B. Image Store on WDS Server ☒
- C. DNS Server

D. Active Directory

☒ **Answer:** B

Explanation: The WDS server stores and manages images in the image repository.

27. How can you automate WDS installations?

- A. Using Group Policy
- B. Using unattended answer files (.xml) ☒
- C. Manually on each client
- D. Using DHCP options

☒ **Answer:** B

Explanation: Answer files automate the installation process.

28. Which of the following is NOT a valid WDS boot image?

- A. Windows PE ☒

- B. Windows Server OS
- C. WinRE
- D. Custom boot images

☒ **Answer:** B

Explanation: Windows Server OS images are install images, not boot images.

29. How do you secure WDS to prevent unauthorized deployments?

- A. Using AD permissions and access control ☒
- B. Using FTP encryption
- C. Disabling DHCP
- D. Using VPN only

☒ **Answer:** A

Explanation: Access is controlled via AD groups and permissions.

30. What file extension do unattended answer files typically have?

- A. .txt
- B. .xml ☒
- C. .ini
- D. .bat

☒ **Answer:** B

Explanation: Answer files are XML formatted.

☒ **HARD (10 Questions)**

31. What is the primary function of the Windows PE boot image in WDS?

- A. Provide a full Windows environment
- B. Boot the client and start the installation process ☒
- C. Store user data
- D. Serve as the OS to install

☒ **Answer:** B

Explanation: Windows PE provides a minimal OS to boot the client and launch setup.

32. Which file in WDS contains configuration for unattended installation?

- A. boot.wim
- B. install.wim
- C. Unattend.xml ☒
- D. setup.exe

☒ **Answer:** C

Explanation: unattend.xml configures automated installs.

33. When capturing a Windows image with WDS, what command line tool is used?

- A. netsh
- B. DISM ☒
- C. ipconfig
- D. msinfo32

☒ **Answer:** B

Explanation: DISM is used to capture and service Windows images.

34. Which Windows Server feature allows WDS to deploy images via multicast?

- A. BITS
- B. Multicast Transmission Protocol (MTP)
- C. WDS Multicast Transmission ☒
- D. BranchCache

☒ **Answer:** C

Explanation: WDS includes multicast transmission for efficient image deployment.

35. Which option in WDS controls the PXE boot policy?

- A. DHCP options
- B. PXE response policy ☒
- C. DNS records

D. Active Directory sites

☒ **Answer:** B

Explanation: PXE response policies determine which clients WDS responds to.

36. How does WDS handle driver injection during deployment?

- A. Drivers cannot be added
- B. Drivers are injected via unattend files or manually ☒
- C. Drivers are downloaded from Windows Update only
- D. Drivers must be pre-installed on the client

☒ **Answer:** B

Explanation: Drivers can be added to images or installed during deployment via unatt
