

Easy (10 MCQs)

1.

What is FSRM used for?

- A) Managing user accounts
- B) Managing file server storage resources ☒
- C) Monitoring network traffic
- D) Installing Windows updates

Answer: B

Explanation: FSRM manages storage on file servers.

2.

Which Windows Server feature provides quotas and file screening?

- A) Active Directory
- B) File Server Resource Manager ☒
- C) Group Policy
- D) DNS Server

Answer: B

Explanation: FSRM provides quotas and file screening features.

3.

What does a hard quota do?

- A) Sends warnings only
- B) Prevents users from exceeding storage limits ☒

- C) Deletes files automatically
- D) Increases storage space

Answer: B

Explanation: Hard quotas strictly enforce storage limits.

4.

Which FSRM feature blocks saving certain file types?

- A) Quotas
- B) File Screens ☒
- C) Reports
- D) Classification

Answer: B

Explanation: File Screens block or audit file types.

5.

True or False: FSRM can generate storage reports.

- A) True ☒
- B) False

Answer: A

Explanation: FSRM generates reports on storage usage.

6.

FSRM is a role service under which Windows Server feature?

- A) Active Directory
- B) File and Storage Services ☒
- C) DNS Server
- D) DHCP Server

Answer: B

Explanation: FSRM is under File and Storage Services.

7.

Which tool is used to manage FSRM?

- A) Event Viewer
- B) FSRM Console ☒
- C) Task Scheduler
- D) PowerShell only

Answer: B

Explanation: FSRM Console is the main management tool.

8.

What type of quota allows users to exceed the limit but logs a warning?

- A) Hard quota
- B) Soft quota ☒
- C) File screen
- D) Audit quota

Answer: B

Explanation: Soft quotas only warn users.

9.

Which file attribute can FSRM classify based on?

- A) File size
- B) File name or extension ☒
- C) File creation date
- D) File owner

Answer: B

Explanation: Classification is often based on name or extension.

10.

FSRM can be installed via:

- A) Control Panel
- B) Server Manager ☒
- C) Windows Update
- D) File Explorer

Answer: B

Explanation: FSRM is installed through Server Manager.

Medium (20 MCQs)

11.

Which PowerShell cmdlet creates a new quota in FSRM?

- A) New-Quota
- B) New-FsrmQuota ☒
- C) Set-Quota
- D) Create-Quota

Answer: B

Explanation: New-FsrmQuota is the correct cmdlet.

12.

What does the File Screen Exception feature allow?

- A) Block all file types
- B) Allow certain file types despite a file screen ☒
- C) Disable file screens
- D) Generate reports

Answer: B

Explanation: Exceptions permit specific files within a screened folder.

13.

FSRM reports can be delivered via:

- A) Email

- B) File share
- C) Both A and B ☒
- D) Neither

Answer: C

Explanation: Reports can be emailed or saved.

14.

Which of the following is NOT a report type in FSRM?

- A) Storage Reports
- B) File Screening Reports
- C) User Account Reports ☒
- D) Quota Reports

Answer: C

Explanation: User Account Reports are not an FSRM feature.

15.

What happens when a user tries to save a blocked file type with active file screening?

- A) File is saved, but logged
- B) File is blocked from saving ☒
- C) User is notified but file saved
- D) Nothing

Answer: B

Explanation: Active file screening blocks saving.

16.

Which FSRM feature automatically tags files based on conditions?

- A) File Screening
- B) Classification ☒
- C) Quotas
- D) Storage Pools

Answer: B

Explanation: Classification tags files automatically.

17.

By default, what action is taken when a quota limit is exceeded?

- A) Block further writes (hard quota)
- B) Send email notification
- C) Log event
- D) All of the above ☒

Answer: D

Explanation: Actions can be configured to do all these.

18.

What storage issue can FSRM help identify using reports?

- A) Disk failure
- B) Large files consuming space ☒

- C) Network congestion
- D) CPU usage

Answer: B

Explanation: FSRM reports show large files and usage.

19.

How can FSRM integrate with Active Directory?

- A) Manage quotas by user or group ☒
- B) Manage IP addresses
- C) Control login hours
- D) None of the above

Answer: A

Explanation: FSRM can set quotas by AD users or groups.

20.

Which component is NOT part of FSRM?

- A) Quota management
- B) File screening management
- C) Group Policy management ☒
- D) Storage reports

Answer: C

Explanation: Group Policy is separate from FSRM.

21.

FSRM quotas can be applied to:

- A) Entire volumes
- B) Specific folders
- C) Both A and B ☒
- D) None of the above

Answer: C

Explanation: Quotas can target volumes or folders.

22.

Which report shows files not accessed for a long time?

- A) Large Files Report
- B) File Aging Report ☒
- C) Quota Usage Report
- D) File Group Report

Answer: B

Explanation: File Aging Report shows stale files.

23.

True or False: Passive file screening blocks file saving.

- A) True
- B) False ☒

Answer: B

Explanation: Passive file screens only audit, no blocking.

24.

What is the maximum size of a quota template in FSRM?

- A) No limit
- B) 1 TB
- C) Configurable by admin ☒
- D) 10 GB

Answer: C

Explanation: Admins can configure quota sizes.

25.

Which protocol does FSRM primarily operate over?

- A) SMB (Server Message Block) ☒
- B) FTP
- C) HTTP
- D) DHCP

Answer: A

Explanation: FSRM manages SMB shares/files.

26.

FSRM classification can trigger which of the following?

- A) File moving
- B) File deletion
- C) Sending notifications
- D) All of the above ☒

Answer: D

Explanation: Classification can automate many actions.

27.

Which FSRM feature allows restricting file types by group?

- A) Quotas
- B) File screening with exceptions ☒
- C) Reports
- D) Classification

Answer: B

Explanation: Exceptions allow tailored blocking.

28.

FSRM reports can be scheduled to run:

- A) Manually only
- B) Automatically on a schedule ☒
- C) Only when storage is full
- D) Only on reboot

Answer: B

Explanation: Scheduling is supported.

29.

FSRM quota templates allow:

- A) Applying predefined quotas to multiple folders ☒
- B) Managing user permissions
- C) Creating file shares
- D) Defining password policies

Answer: A

Explanation: Templates simplify quota management.

30.

Which log records file screen violations?

- A) Security log
- B) File Screen Audit log ☒
- C) System log
- D) Application log

Answer: B

Explanation: Violations are logged in File Screen Audit.

Hard (10 MCQs)

31.

Which FSRM component can integrate with System Center for enhanced reporting?

- A) File Screening
- B) Quota Management
- C) Storage Reports ☒
- D) Classification

Answer: C

Explanation: Storage Reports can integrate with System Center.

32.

What PowerShell cmdlet is used to create a file screen?

- A) New-FsrmFileScreen ☒
- B) Add-FileScreen
- C) Create-FileScreen
- D) Set-FsrmScreen

Answer: A

Explanation: New-FsrmFileScreen creates file screens.

33.

Which FSRM report shows duplicate files?

- A) Storage Reports
- B) Duplicate Files Report ☒

- C) File Group Report
- D) Quota Usage Report

Answer: B

Explanation: Duplicate Files Report identifies duplicate data.

34.

FSRM classification rules use which language for property matching?

- A) Regular expressions (Regex) ☒
- B) XML
- C) SQL
- D) PowerShell

Answer: A

Explanation: Classification uses regex for pattern matching.

35.

Which Windows Server versions support FSRM?

- A) Only Server 2016+
- B) Server 2008 R2 and later ☒
- C) Only Server 2019+
- D) Windows 10 only

Answer: B

Explanation: FSRM is supported on Server 2008 R2+.

36.

File screens in FSRM can be configured to block based on:

- A) File extension
- B) File name patterns
- C) Both A and B ☒
- D) File size

Answer: C

Explanation: Both extensions and names can be screened.

37.

What is the minimum permission required to configure FSRM quotas?

- A) Read
- B) Full Control on target folder ☒
- C) Modify
- D) Execute

Answer: B

Explanation: Full Control permission is needed.

38.

Which PowerShell cmdlet removes a quota template?

- A) Remove-FsrmQuotaTemplate ☒
- B) Delete-QuotaTemplate
- C) Remove-Quota
- D) Clear-QuotaTemplate

Answer: A

Explanation: Correct cmdlet for template removal.

39.

FSRM classification properties do NOT include:

- A) File Owner ☒
- B) File Extension
- C) File Path
- D) File Size

Answer: A

Explanation: FSRM does not classify by file owner.

40.

Which of the following actions cannot be automated with FSRM file management tasks?

- A) Sending notifications
- B) Moving files
- C) Running custom scripts
- D) Changing NTFS permissions ☒

Answer: D

Explanation: Changing NTFS permissions is not automated via FSRM.
