

1.

Which tool is used to configure Local Security Policy in Windows?

- A. gpupdate
- B. secpol.msc
- C. gpmmc.msc
- D. netplwiz

☒ **Answer: B**

Explanation: secpol.msc opens the Local Security Policy management console.

2.

Group Policy is primarily used in which environment?

- A. Workgroup
- B. Standalone
- C. Domain
- D. Cloud

☒ **Answer: C**

Explanation: Group Policies are managed centrally in a domain environment using Active Directory.

3.

What is the default update interval for Group Policy on domain computers?

- A. 10 minutes
- B. 30 minutes
- C. 90 minutes
- D. 120 minutes

☒ **Answer: C**

Explanation: GPOs refresh every 90 minutes with a 0–30 minute random offset.

4.

What is the command to manually force Group Policy update?

- A. gpedit

- B. gpmmc
- C. gpupdate /force
- D. secpol

☒ **Answer: C**

Explanation: gpupdate /force forces immediate application of policies.

5.

Which Local Policy section defines what users can do on a system?

- A. Security Options
- B. Audit Policy
- C. User Rights Assignment
- D. Account Policies

☒ **Answer: C**

Explanation: "User Rights Assignment" controls privileges like shutting down or logging on.

6.

What is the Local Group Policy Editor command?

- A. gpmmc.msc
- B. lusrmgr.msc
- C. gpedit.msc
- D. dsa.msc

☒ **Answer: C**

Explanation: gpedit.msc opens the Local Group Policy Editor.

7.

Which GPO section contains password policies?

- A. Administrative Templates
- B. Security Options
- C. Account Policies
- D. User Configuration

☒ **Answer: C**

Explanation: Account policies contain password policies and account lockout settings.

8.

Group Policies can be linked to all EXCEPT:

- A. Sites
- B. Domains
- C. OUs
- D. Workgroups

☒ **Answer: D**

Explanation: GPOs are not applicable in Workgroups; they require a domain.

9.

Which policy has the highest precedence in case of conflict?

- A. Site
- B. Domain
- C. OU
- D. Local

☒ **Answer: C**

Explanation: Policy order is LSDOU. OU-level GPOs override Domain and Site.

10.

Which MMC snap-in is used to manage domain-level GPOs?

- A. gpedit.msc
- B. secpol.msc
- C. gpmc.msc
- D. dsa.msc

☒ **Answer: C**

Explanation: gpmc.msc (Group Policy Management Console) is used for domain GPOs.

☒ Medium (20 Questions)

11.

Which of the following best describes a GPO?

- A. Firewall rule
- B. Network device
- C. A set of policy settings
- D. Service account

☒ **Answer:** C

Explanation: A GPO (Group Policy Object) is a container of settings applied to users and computers.

12.

Which setting disables USB storage devices across the enterprise?

- A. Local Security Policy
- B. OU-linked GPO
- C. Account Policies
- D. secpol.msc

☒ **Answer:** B

Explanation: Domain GPOs applied to OUs are used to enforce hardware restrictions.

13.

Which command shows the result of applied GPOs on a computer?

- A. gpresult /r
- B. gpmmc.msc
- C. secedit /configure

D. net accounts

☒ **Answer:** A

Explanation: gpresult /r displays the Resultant Set of Policy (RSoP).

14.

Which setting can be used to log successful logons?

A. User Rights Assignment

B. Audit Policy

C. Security Options

D. Account Lockout Policy

☒ **Answer:** B

Explanation: Audit Policy controls logging of events like successful logons.

15.

What does RSoP stand for?

A. Result Set of Policies

B. Real-time Security of Policy

C. Resultant Set of Policy

D. Role Set of Policy

☒ **Answer:** C

Explanation: RSoP shows which policies are effective on a system.

16.

What is the GPO inheritance order?

A. OU ☒ Domain ☒ Site ☒ Local

B. Local ☒ Domain ☒ Site ☒ OU

C. Site ☒ Domain ☒ OU ☒ Local

D. Local ☒ Site ☒ Domain ☒ OU

☒ **Answer:** D

Explanation: The correct order is Local ☒ Site ☒ Domain ☒ OU.

17.

What is the default behavior if multiple GPOs apply with conflicting settings?

- A. Local settings override
- B. Site settings override
- C. Last applied wins
- D. First applied wins

☒ **Answer:** C

Explanation: In case of conflicts, the setting from the last applied GPO wins.

18.

How can you block inheritance of GPOs on an OU?

- A. Use secpol.msc
- B. Disable GPO
- C. Enable Block Inheritance
- D. Delete GPO

☒ **Answer:** C

Explanation: You can block inheritance at the OU level using GPMC.

19.

To enforce a GPO so it overrides others, what should be enabled?

- A. Audit Policy
- B. Enforced
- C. Disable GPO
- D. Loopback

☒ **Answer:** B

Explanation: The "Enforced" option ensures a GPO takes precedence over others.

20.

Which policy setting enables password complexity?

- A. Security Options
- B. Administrative Templates
- C. Account Policies
- D. Software Restriction Policies

☒ **Answer:** C

Explanation: Password complexity is set in Account Policies.

21.

What is the role of gpedit.msc?

- A. Manage domain GPOs
- B. Configure AD DS
- C. Edit local GPO
- D. Configure DNS

☒ **Answer:** C

Explanation: gpedit.msc is for editing Local Group Policy on a system.

22.

Which policy disables command prompt for users?

- A. Audit Policy
- B. Administrative Templates ☒ System
- C. Security Options
- D. User Rights Assignment

☒ **Answer:** B

Explanation: This is set under Administrative Templates ☒ System.

23.

What does "Loopback processing" modify?

- A. Network settings
- B. Computer security
- C. User policy based on computer

D. Password expiration

☒ **Answer:** C

Explanation: Loopback forces user settings to follow computer's GPO.

24.

Which tool is used to back up and restore GPOs?

A. secpol

B. gpresult

C. GPMC

D. netsh

☒ **Answer:** C

Explanation: GPMC has import/export and backup/restore options.

25.

What kind of filtering can be applied to a GPO?

A. VLAN filtering

B. Group-based security filtering

C. Registry filtering

D. BIOS filtering

☒ **Answer:** B

Explanation: Security filtering restricts GPO application to certain users/groups.

26.

What would you use to apply policies only to laptops in an OU?

A. GPMC

B. WMI Filter

C. Audit Policy

D. User Rights

☒ **Answer:** B

Explanation: WMI filters allow targeting policies based on hardware or OS info.

27.

What file stores the local GPO settings?

- A. localpol.msc
- B. registry.pol
- C. group.ini
- D. polconfig.dat

☒ **Answer:** B

Explanation: registry.pol stores local GPO settings for Administrative Templates.

28.

Which policy setting logs access to sensitive files?

- A. Account Lockout
- B. Audit Object Access
- C. Group Membership
- D. Security Options

☒ **Answer:** B

Explanation: Enables logging for access to files, folders, and registry keys.

29.

How can an administrator prevent users from installing software?

- A. Firewall rules
- B. AppLocker/Software Restriction Policies
- C. Audit Policy
- D. Password Policy

☒ **Answer:** B

Explanation: AppLocker or SRP are used to restrict software execution.

30.

Which component enables centralized GPO management?

- A. secpol.msc
- B. GPMC
- C. Task Manager
- D. Local Group Policy

☒ **Answer:** B

Explanation: GPMC is the main GUI tool for managing domain-level GPOs.

☒ Hard (10 Questions)

31.

Which GPO setting takes precedence if a GPO is linked to both domain and OU?

- A. Domain
- B. OU
- C. Local
- D. Site

☒ **Answer:** B

Explanation: OU-linked GPOs are applied after domain GPOs and can override them.

32.

What happens if two GPOs set conflicting user settings and both are linked to the same OU?

- A. Random one applies
- B. Both apply
- C. Higher priority (top) wins
- D. None applies

☒ **Answer:** C

Explanation: GPOs are applied in order from bottom to top in the GPMC list.

33.

Which of the following restricts policy application to only Windows 10 devices?

- A. Security Filtering
- B. GPO precedence
- C. WMI Filter
- D. Account Policy

☒ **Answer: C**

Explanation: WMI filters use system queries to target OS version or hardware.

34.

How do you prevent specific users from receiving a GPO?

- A. Move to different OU
- B. Remove read permission on GPO
- C. Use security filtering
- D. All of the above

☒ **Answer: D**

Explanation: All options can prevent GPO application based on scope and permissions.

35.

If a GPO is enforced, which of the following is true?

- A. It can be blocked
- B. It overrides child GPOs
- C. It is applied only on OUs
- D. It is always user policy

☒ **Answer: B**

Explanation: Enforced GPOs override all child GPO settings, even if inheritance is blocked.

36.

Which policy can enforce lockout after failed logon attempts?

- A. Security Options
- B. User Rights Assignment
- C. Account Lockout Policy
- D. Audit Logon Events

☒ **Answer:** C

Explanation: The Account Lockout Policy controls thresholds and response to failed logons.

37.

What must be enabled to use advanced auditing in Windows?

- A. gpedit.msc
- B. Advanced Audit Policy Configuration
- C. Account Policy
- D. Event Viewer

☒ **Answer:** B

Explanation: Advanced auditing allows detailed logging beyond classic audit policy.

38.

What kind of setting is "Do not display last username at logon"?

- A. Account Policy
- B. User Rights Assignment
- C. Security Options
- D. Registry setting

☒ **Answer:** C

Explanation: This is a Security Option enhancing logon privacy.

39.

Where are domain-based GPOs stored?

- A. SYSVOL folder
- B. Registry
- C. NTFS root

D. GPOConfig.ini

☒ **Answer:** A

Explanation: GPOs are stored and replicated in the SYSVOL folder on domain controllers.

40.

Which GPO mode allows user policy to be applied based on the computer it logs into?

A. Security Filtering

B. Loopback Merge

C. WMI Filtering

D. Enforced

☒ **Answer:** B

Explanation: Loopback (in merge mode) applies computer-based user policies.
