

☒ Easy (10 Questions)

1. What does VPN stand for?

- A. Virtual Protocol Network
- B. Virtual Private Network
- C. Verified Private Network
- D. Virtual Protected Node

☒ **Answer:** B

☒ **Explanation:** VPN stands for Virtual Private Network. It creates a secure tunnel over a public network.

2. Which protocol does SSTP VPN use?

- A. TCP 1723
- B. UDP 1701
- C. TCP 443
- D. UDP 500

☒ **Answer:** C

☒ **Explanation:** SSTP uses port TCP 443 to tunnel VPN traffic securely through HTTPS.

3. What is a key requirement for DirectAccess clients?

- A. Linux OS
- B. iOS
- C. Windows 10/11 Enterprise
- D. Windows 7 Home

☒ **Answer:** C

❏ **Explanation:** Only Enterprise editions of Windows support DirectAccess.

4. Which of these is used in Site-to-Site VPN?

- A. Smartcard login
- B. IPsec tunnel
- C. RADIUS
- D. NFS

❏ **Answer:** B

❏ **Explanation:** Site-to-Site VPNs typically use IPsec tunnels between routers.

5. What Windows Server role allows VPN and DirectAccess configuration?

- A. File Server
- B. Remote Access
- C. IIS
- D. NAP

❏ **Answer:** B

❏ **Explanation:** The Remote Access role includes support for DirectAccess and VPN.

6. Which of the following is not a VPN tunneling protocol?

- A. PPTP
- B. L2TP
- C. SSH

D. SSTP

☒ **Answer:** C

☒ **Explanation:** SSH is used for secure remote shell access, not VPN tunneling.

7. What port does PPTP use?

A. TCP 443

B. TCP 1723

C. UDP 1701

D. UDP 500

☒ **Answer:** B

☒ **Explanation:** PPTP uses TCP 1723 and GRE protocol for tunneling.

8. Which of the following is not an authentication method used in VPNs?

A. Smartcards

B. Certificates

C. Biometrics

D. IPsec

☒ **Answer:** D

☒ **Explanation:** IPsec is a security protocol, not an authentication method.

9. What does IP-HTTPS do in DirectAccess?

A. Blocks HTTPS

- B. Tunnels IPv6 over HTTPS
- C. Encrypts emails
- D. Authenticates VPN

☒ **Answer:** B

☒ **Explanation:** IP-HTTPS encapsulates IPv6 traffic in HTTPS packets.

10. Which role service is required to issue certificates for DirectAccess?

- A. DNS
- B. DHCP
- C. AD CS
- D. IIS

☒ **Answer:** C

☒ **Explanation:** Active Directory Certificate Services (AD CS) issues certificates used in DirectAccess.

☒ Medium (20 Questions)

11. Which protocol is used with L2TP for encryption?

- A. GRE
- B. SSL
- C. IPsec
- D. TLS

☒ **Answer:** C

☒ **Explanation:** L2TP itself doesn't provide encryption; it relies on IPsec for encryption.

12. What type of VPN allows remote clients to connect to a corporate network?

- A. Site-to-Site
- B. Remote Access VPN
- C. DirectAccess
- D. Backbone VPN

☒ **Answer:** B

☒ **Explanation:** Remote Access VPNs are used for individual clients to connect to a network.

13. Which port must be open for IPsec NAT-T?

- A. TCP 1723
- B. UDP 4500
- C. UDP 1701
- D. TCP 443

☒ **Answer:** B

☒ **Explanation:** NAT Traversal for IPsec uses UDP 4500.

14. Which IPsec mode is used in Site-to-Site VPN?

- A. Transport
- B. Tunnel
- C. Layer 2
- D. HTTPS

☒ **Answer:** B

☒ **Explanation:** Tunnel mode encapsulates the entire IP packet for network-to-network connections.

15. What Group Policy object (GPO) is essential for DirectAccess clients?

- A. Local Admin Policy
- B. VPN Settings
- C. DirectAccess Client Settings
- D. IP Filter Settings

☒ **Answer:** C

☒ **Explanation:** A specific GPO is applied to DirectAccess clients for configuration.

16. What component authenticates VPN clients in a domain?

- A. DHCP
- B. NPS
- C. RRAS
- D. AD DS

☒ **Answer:** B

☒ **Explanation:** Network Policy Server (NPS) handles RADIUS authentication for VPN.

17. Which transition technology does DirectAccess use?

- A. NAT
- B. RADIUS
- C. 6to4
- D. SMB

☒ **Answer:** C

❏ **Explanation:** DirectAccess uses IPv6 transition technologies like 6to4 and Teredo.

18. What must a VPN client have to connect using L2TP/IPsec?

- A. Hostname
- B. Public IP
- C. Shared secret or certificate
- D. Email address

❏ **Answer:** C

❏ **Explanation:** L2TP/IPsec requires either a shared key or certificate for authentication.

19. Which IPsec protocol handles key negotiation?

- A. ESP
- B. AH
- C. IKE
- D. GRE

❏ **Answer:** C

❏ **Explanation:** IKE (Internet Key Exchange) handles key management in IPsec.

20. Which tool monitors DirectAccess health on the server?

- A. Event Viewer
- B. Network Monitor
- C. Remote Access Management Console

D. Wireshark

☒ **Answer:** C

☒ **Explanation:** The Remote Access Management Console provides built-in monitoring for DirectAccess.

21. Which VPN protocol offers the strongest encryption and flexibility?

A. PPTP

B. L2TP

C. SSTP

D. IKEv2

☒ **Answer:** D

☒ **Explanation:** IKEv2 is robust, supports mobility, and strong encryption.

22. A DirectAccess client is not connecting. What's the first thing to check?

A. Wi-Fi signal

B. DNS name resolution

C. IP address of DNS server

D. Web browser settings

☒ **Answer:** B

☒ **Explanation:** DirectAccess heavily relies on DNS; resolving internal names is key.

23. DirectAccess clients must be a member of which domain?

A. Any domain

- B. Trusted domains
- C. Specific security group in local AD
- D. Azure AD only

☒ **Answer:** C

☒ **Explanation:** Clients must be in a configured security group in the domain.

24. Which certificate is required for SSTP?

- A. Code-signing cert
- B. SSL certificate
- C. Email certificate
- D. IPsec certificate

☒ **Answer:** B

☒ **Explanation:** SSTP uses an SSL certificate bound to TCP port 443.

25. Why is NAT-T used with IPsec?

- A. It increases speed
- B. It disables IPsec
- C. It bypasses port forwarding
- D. It allows IPsec through NAT devices

☒ **Answer:** D

☒ **Explanation:** NAT-T (NAT Traversal) allows IPsec to pass through NAT routers.

26. How is DirectAccess different from VPN in connection behavior?

- A. Slower
- B. Always-on and automatic
- C. Unencrypted
- D. Used only at the office

☒ **Answer:** B

☒ **Explanation:** DirectAccess connects automatically when internet is available.

27. What protocol is used for DirectAccess management tunnels?

- A. HTTPS
- B. IPsec
- C. SMB
- D. RDP

☒ **Answer:** B

☒ **Explanation:** IPsec tunnels manage communication with infrastructure servers.

28. VPN client cannot connect. RRAS is running. What else should be checked?

- A. AD DS availability
- B. Group Policy update
- C. Firewall port configuration
- D. USB port settings

☒ **Answer:** C

☒ **Explanation:** Firewall may block necessary VPN ports like TCP 1723 or UDP 500.

29. In VPN, which layer handles encryption?

- A. Application
- B. Transport
- C. Network
- D. Data Link

☒ **Answer:** C

☒ **Explanation:** IPsec encryption is at the Network layer.

30. What is used to deploy VPN settings to many clients in a domain?

- A. SCCM
- B. Group Policy
- C. DNS server
- D. DHCP server

☒ **Answer:** B

☒ **Explanation:** GPOs can be used to deploy VPN connections to clients.

☒ **Hard (10 Questions)**

31. What is the default behavior of DirectAccess when a client is on the internal network?

- A. It creates a VPN tunnel
- B. It disables NIC
- C. It doesn't connect via DirectAccess
- D. It fails

☒ **Answer:** C

☒ **Explanation:** DirectAccess detects internal network and disables the tunnel automatically.

32. In a hybrid deployment, what ensures split tunneling in DirectAccess?

A. DHCP options

B. Name Resolution Policy Table (NRPT)

C. Route Print

D. Firewall settings

☒ **Answer:** B

☒ **Explanation:** NRPT defines which DNS queries go through the DirectAccess tunnel.

33. What is the preferred DirectAccess tunnel when both IP-HTTPS and Teredo are available?

A. Teredo

B. IP-HTTPS

C. 6to4

D. SSL

☒ **Answer:** A

☒ **Explanation:** Teredo is preferred over IP-HTTPS due to performance, unless disabled.

34. A VPN client connects, but cannot access file shares. What's likely missing?

A. Default gateway

B. DNS suffix

- C. NPS role
- D. IP address

☒ **Answer:** B

☒ **Explanation:** Without DNS suffix or proper DNS settings, clients can't resolve internal names.

35. What allows DirectAccess server to determine client location?

- A. DNS Suffix
- B. NRPT
- C. Network Location Server (NLS)
- D. AD Sites

☒ **Answer:** C

☒ **Explanation:** The NLS is a web server used to detect internal vs external status.

36. What command shows DirectAccess tunnel status on client?

- A. netstat -r
- B. ipconfig /all
- C. Get-DACConnectionStatus
- D. ping localhost

☒ **Answer:** C

☒ **Explanation:** PowerShell cmdlet Get-DACConnectionStatus provides DirectAccess status.

37. What must be configured for IPsec authentication in DirectAccess?

- A. NAT rules
- B. DNS forwarding
- C. Certificate-based trust
- D. RADIUS server

☒ **Answer:** C

☒ **Explanation:** IPsec authentication uses certificates to verify trust.

38. In a dual-NIC DirectAccess setup, which NIC is configured with a public IP?

- A. Internal
- B. Loopback
- C. External
- D. VPN

☒ **Answer:** C

☒ **Explanation:** External NIC must be reachable from the internet.

39. Which log is best for diagnosing RRAS VPN issues?

- A. System log
- B. Security log
- C. RemoteAccess.log
- D. Application log

☒ **Answer:** C

☒ **Explanation:** RemoteAccess log contains RRAS and DirectAccess logs.

40. A VPN user can connect but cannot browse internal resources. What's a possible reason?

- A. DHCP lease expired
- B. DNS settings not pushed
- C. Wrong password
- D. Certificate expired

☒ **Answer:** B

☒ **Explanation:** If DNS settings aren't provided, clients can't resolve internal names.
