

☒ Easy (10 MCQs)

1.

What is the main purpose of chain of custody?

- A) Encrypt data
- B) Track who accessed evidence
- C) Make backup copies
- D) Clean the system

Answer: B

Ensures accountability and integrity of evidence.

2.

Which of these is a part of digital forensic process?

- A) Formatting
- B) Extraction
- C) Defragmentation
- D) Editing

Answer: B

3.

Which role manages the overall response during an incident?

- A) Developer

- B) Team Leader
- C) Accountant
- D) Reporter

Answer: B

4.

Volatile data is found in:

- A) SSD
- B) RAM
- C) CD
- D) HDD

Answer: B

5.

Preservation ensures:

- A) Data is deleted
- B) Logs are erased
- C) Evidence integrity
- D) System reboot

Answer: C

6.

What to do before an incident?

- A) Ignore policies
- B) Plan incident response
- C) Delete logs
- D) Shut down systems

Answer: B

7.

Tool for memory analysis:

- A) Paint
- B) FTK
- C) Volatility
- D) Audacity

Answer: C

8.

Goal of forensic analysis is to:

- A) Hack systems
- B) Create malware
- C) Find legal evidence
- D) Play games

Answer: C

9.

Which is NOT a cyber forensic type?

- A) Disk
- B) Memory
- C) Cloud
- D) Photoshop

Answer: D

10.

Documentation is needed for:

- A) Editing data
- B) Court acceptance
- C) Data loss
- D) Formatting

Answer: B

☒ Medium (20 MCQs)

11.

Which activity comes after preservation?

- A) Identification
- B) Presentation
- C) Extraction
- D) Formatting

Answer: C

12.

What is included in incident response plan?

- A) Game design
- B) Communication steps
- C) Logo designs
- D) Download sites

Answer: B

13.

Who creates analysis reports in forensic teams?

- A) Janitor
- B) Forensic Analyst

- C) Graphic Designer
 - D) System Builder
- Answer: B**
-

14.

Which is a technique used in cyber forensics?

- A) Data hiding
- B) Packet sniffing
- C) SEO
- D) Image filtering

Answer: B

15.

Cloud forensics deals with:

- A) Mobile data
- B) Internet-based storage
- C) Hard disks
- D) Windows registry

Answer: B

16.

Bit-by-bit copy of storage device is called:

- A) Cloning
- B) Imaging
- C) Indexing
- D) Patching

Answer: B

17.

Detecting incidents requires:

- A) SIEM tools
- B) MS Paint
- C) Disk defrag
- D) CMD only

Answer: A

18.

Preparation includes:

- A) Reacting to attack
- B) Ignoring alerts
- C) Creating procedures
- D) Erasing data

Answer: C

19.

Which is NOT volatile data?

- A) RAM
- B) Cache
- C) CPU register
- D) SSD

Answer: D

20.

Mobile forensics includes:

- A) Only iPhones
- B) Android and iOS
- C) Laptops
- D) Routers

Answer: B

21.

Which of the following helps ensure evidence validity?

- A) Antivirus
- B) Chain of custody
- C) Proxy server
- D) DHCP

Answer: B

22.

Which is found in interpretation phase?

- A) Malware creation
- B) Timeline analysis
- C) Hashing
- D) Data destruction

Answer: B

23.

Incident Response Team should be:

- A) Trained
- B) Random
- C) Freelancers
- D) Outsourced always

Answer: A

24.

Database forensics includes:

- A) Email tracing
- B) SQL logs and data
- C) MAC address spoofing
- D) Photoshop files

Answer: B

25.

First thing to do when incident is detected:

- A) Ignore it
- B) Isolate the system
- C) Format drive
- D) Disable antivirus

Answer: B

26.

Network forensics tools analyze:

- A) Images
- B) Traffic logs

- C) USBs
 - D) Code only
- Answer: B**
-

27.

Proper documentation format includes:

- A) Hash values
- B) Team photos
- C) Chat messages
- D) Username only

Answer: A

28.

Disk forensics helps recover:

- A) Web ads
- B) Lost or deleted data
- C) Movies
- D) Router configuration

Answer: B

29.

Incident detection signs include:

- A) Bright screen
- B) Unusual logs
- C) Color changes
- D) Loud fan

Answer: B

30.

Forensic readiness means:

- A) Ready to attack
- B) Able to handle evidence correctly
- C) Hacking tools loaded
- D) None

Answer: B

☒ Hard (10 MCQs)

31.

Which of the following ensures integrity of preserved data?

- A) Logging

- B) Firewall
- C) Hashing
- D) Formatting

Answer: C

32.

Which of these is a volatile forensic artifact?

- A) Event logs
- B) Browser history
- C) Network connections
- D) Email archive

Answer: C

33.

Best way to extract memory content is via:

- A) FTK
- B) Autopsy
- C) Volatility
- D) DBAN

Answer: C

34.

Chain of custody should be maintained:

- A) Only at court
- B) From collection to court
- C) After trial
- D) When needed

Answer: B

35.

Evidence stored in .E01 format is:

- A) Hash file
- B) Image file
- C) Malware
- D) Logs

Answer: B

36.

Legal admissibility of evidence depends on:

- A) Number of files
- B) Date created
- C) Integrity and proper chain
- D) Size of hard drive

Answer: C

37.

Cyber forensics is governed by which ISO standard?

- A) 9001
- B) 17025
- C) 14001
- D) 27032

Answer: B

38.

Live response is needed when:

- A) System is off
- B) Malware has erased logs
- C) System is active and running
- D) Evidence is not needed

Answer: C

39.

Memory dump tools capture:

- A) Disk images
- B) File structures
- C) RAM content
- D) Wi-Fi speed

Answer: C

40.

Forensic audit trail ensures:

- A) Evidence can't be tracked
- B) Data is hidden
- C) Activities are recorded and traceable
- D) Data is erased

Answer: C
