

☒ 10 Easy-Level MCQs

1.

What does ISO/IEC 17025 focus on in cyber forensics?

- A) Privacy rights
- B) Lab accreditation and competence
- C) Encryption tools
- D) File system recovery

☒ **Answer: B**

Explanation: ISO/IEC 17025 sets standards for lab competency and method validation.

2.

Which phase involves collecting disk images and RAM dumps?

- A) Preservation
- B) Collection
- C) Documentation
- D) Analysis

☒ **Answer: B**

Explanation: Collection involves acquiring data from sources.

3.

What is the final phase of a cyber forensic investigation?

- A) Identification
- B) Analysis
- C) Reporting
- D) Examination

☒ **Answer: C**

4.

Which legal framework deals with data privacy in the European Union?

- A) HIPAA
- B) GDPR
- C) IT Act
- D) DMCA

☒ **Answer: B**

5.

Which of these ensures evidence hasn't been tampered with?

- A) MAC address
- B) Timestamp
- C) Hash value
- D) File name

☒ **Answer: C**

6.

What is the primary goal of forensic documentation?

- A) Automate investigation
- B) Record all actions and findings
- C) Enhance system performance
- D) Track antivirus updates

☒ **Answer: B**

7.

A good forensic investigation must be:

- A) Slow and unrecorded
- B) Thorough and well-documented
- C) Secretive and destructive
- D) Opinion-based

☒ **Answer: B**

8.

Which tool is widely used for disk imaging?

- A) Notepad

- B) FTK Imager
- C) Excel
- D) Adobe Reader

☒ **Answer: B**

9.

What does PII stand for in forensics?

- A) Private Internet Identifier
- B) Public Interface Information
- C) Personally Identifiable Information
- D) Public Indexed Information

☒ **Answer: C**

10.

In privacy-sensitive forensics, what should be done with irrelevant personal data?

- A) Publish it
- B) Modify it
- C) Redact it
- D) Ignore it

☒ **Answer: C**

☒ 20 Medium-Level MCQs

11.

Which standard specifically guides evidence acquisition and preservation?

- A) ISO/IEC 27042
- B) ISO/IEC 27037
- C) ISO/IEC 27001
- D) FISMA

☒ **Answer: B**

12.

Which of the following is NOT part of the standard forensic investigation process?

- A) Authentication
- B) Preservation
- C) Guessing
- D) Documentation

☒ **Answer: C**

13.

During which phase do analysts search for hidden or deleted files?

- A) Reporting
- B) Documentation
- C) Examination
- D) Preparation

☒ **Answer: C**

14.

What best describes 'chain of custody'?

- A) Transfer of legal rights
- B) Record of evidence handling
- C) Email encryption
- D) File renaming history

☒ **Answer: B**

15.

Which of the following is NOT a role of a forensic report?

- A) Educate the media
- B) Document tools used
- C) Present analysis
- D) Describe findings

☒ **Answer: A**

16.

Which U.S. standard outlines mobile forensics procedures?

- A) SWGDE
- B) NIST SP 800-101
- C) ISO/IEC 27042
- D) HIPAA

☒ **Answer: B**

17.

Why is accreditation important in digital forensics?

- A) It speeds up imaging
- B) It guarantees tool availability
- C) It provides legal and procedural credibility
- D) It allows tool monetization

☒ **Answer: C**

18.

Which phase comes immediately after Identification in the forensic process?

- A) Preparation
- B) Preservation

- C) Reporting
- D) Examination

☒ **Answer: B**

19.

Which of the following is considered volatile evidence?

- A) Browser history
- B) System logs
- C) Memory (RAM)
- D) Hard disk contents

☒ **Answer: C**

20.

Which document defines investigator authority and legal scope?

- A) Chain of Custody
- B) Accreditation Certificate
- C) Search Warrant
- D) Executive Summary

☒ **Answer: C**

21.

If a forensic lab is not ISO accredited, the evidence may be:

- A) Prioritized in court
- B) Dismissed due to lack of credibility
- C) Automatically validated
- D) Considered encrypted

☒ **Answer: B**

22.

What is a key difference between Examination and Analysis phases?

- A) Examination is visual only
- B) Analysis uses reasoning to derive conclusions
- C) Analysis is skipped in cyber forensics
- D) Examination always involves encryption

☒ **Answer: B**

23.

Why is evidence hashing done immediately after collection?

- A) To change format
- B) To speed up processing
- C) To prove data integrity
- D) To encrypt files

☒ Answer: C

24.

GDPR requires which of the following before collecting user data?

- A) Contract
- B) Consent
- C) Encryption
- D) User ID

☒ Answer: B

25.

Which of the following is NOT a recommended forensic tool?

- A) EnCase
- B) FTK
- C) Paint
- D) Autopsy

☒ Answer: C

26.

Who is responsible for securing irrelevant private data found during a forensic investigation?

- A) Police
- B) Forensic investigator
- C) Developer
- D) System admin

☒ **Answer: B**

27.

Which report section typically includes screenshots and evidence artifacts?

- A) Appendix
- B) Executive Summary
- C) Scope
- D) Disclaimer

☒ **Answer: A**

28.

HIPAA compliance is required when handling:

- A) Military files
- B) Financial logs
- C) Health records
- D) Browser data

☒ **Answer: C**

29.

Which principle states that digital evidence must not be modified?

- A) Admissibility Principle
- B) Chain of Custody
- C) Forensic Soundness
- D) Data Encapsulation

☒ **Answer: C**

30.

In legal proceedings, digital evidence from a non-accredited lab may face:

- A) Higher acceptance
- B) Exclusion or challenge
- C) Priority review
- D) Fast-track status

☒ **Answer: B**

☒ **10 Hard-Level MCQs**

31.

Which standard provides guidelines for analysis and interpretation of digital evidence?

- A) ISO/IEC 27037
- B) ISO/IEC 27042
- C) ISO 9001
- D) FIPS 140

☒ **Answer: B**

32.

Which phase includes identifying compromised systems and sources of evidence?

- A) Preparation
- B) Analysis
- C) Identification
- D) Collection

☒ **Answer: C**

33.

Failure to maintain privacy boundaries during an investigation can lead to:

- A) Faster results
- B) User appreciation
- C) Legal penalties or case dismissal
- D) Better evidence integrity

☒ Answer: C

34.

An investigation that proceeds without proper legal authorization is:

- A) Efficient
- B) Unauthorized and invalid
- C) Faster and safer
- D) Automatically legal

☒ Answer: B

35.

Which of the following must be validated in a forensic lab?

- A) Analyst's clothes
- B) Evidence cables
- C) Tools and methods used
- D) Database size

☒ Answer: C

36.

Data anonymization is important when:

- A) Creating audit logs
- B) Storing malware
- C) Handling irrelevant personal data
- D) Viewing encrypted traffic

☒ **Answer: C**

37.

Forensics must avoid analysis of PII unless:

- A) It is encrypted
- B) Explicitly authorized
- C) Owned by the investigator
- D) Hidden by malware

☒ **Answer: B**

38.

The best way to prove the integrity of collected data is:

- A) Manual inspection
- B) Interviewing the user
- C) Using checksum/hashing
- D) Compressing files

☒ **Answer: C**

39.

Which phase includes reasoning, timeline building, and attack path reconstruction?

- A) Documentation
- B) Preservation
- C) Analysis
- D) Collection

☒ **Answer: C**

40.

In forensic accreditation, a lab failing periodic audits might lose:

- A) Access to suspects
- B) Chain of custody rights
- C) Legal credibility and accreditation status
- D) Their imaging software

☒ **Answer: C**
