

☒ 10 Easy-Level MCQs

1.

Which tool is used to create forensic images of drives and memory?

- A) Notepad
- B) FTK Imager
- C) Excel
- D) Task Manager

☒ **Answer: B**

Explanation: FTK Imager is a widely used free tool for creating forensic disk/memory images.

2.

What does a hex editor display?

- A) Only text
- B) Binary in ASCII only
- C) Data in hexadecimal and ASCII format
- D) Encrypted files

☒ **Answer: C**

3.

Which tool is known for inspecting running processes better than Task Manager?

- A) Process Explorer
- B) Paint
- C) FTK Imager
- D) WinHex

☒ **Answer: A**

4.

FTK Forensic Toolkit is developed by:

- A) Microsoft
- B) AccessData
- C) Norton
- D) Sysinternals

☒ **Answer: B**

5.

Which Sysinternals tool allows you to view all programs that run at startup?

- A) PsExec
- B) Autoruns
- C) WinDbg
- D) CMD

☒ **Answer: B**

6.

Which of the following is a forensic suite developed by PassMark Software?

- A) FTK
- B) OSF
- C) Wireshark
- D) Volatility

☒ **Answer: B**

7.

Which hex editor is known for being free and lightweight?

- A) FTK
- B) EnCase
- C) HxD
- D) OSF

☒ **Answer: C**

8.

What does FTK Imager use to verify the integrity of an image?

- A) Timestamps
- B) File size

C) Hashing (MD5/SHA1)

D) File count

☒ **Answer: C**

9.

Which tool is useful for checking network connections live?

A) RAMMap

B) TCPView

C) Hex Viewer

D) Recuva

☒ **Answer: B**

10.

The primary purpose of a hex editor in forensics is to:

A) Edit photos

B) View encrypted traffic

C) Analyze binary files byte-by-byte

D) Compress logs

☒ **Answer: C**

☒ 20 Medium-Level MCQs

11.

Which FTK feature helps in analyzing deleted emails and attachments?

- A) Registry viewer
- B) Email parsing module
- C) Task scheduler
- D) Web scanner

☒ **Answer: B**

12.

Which Sysinternals tool is used to execute remote commands?

- A) PsExec
- B) AutoRuns
- C) TaskKill
- D) FTK Runner

☒ **Answer: A**

13.

OSForensics includes which of the following features?

- A) Only file carving
- B) Email recovery
- C) SQL analysis
- D) BIOS cracking

☒ **Answer: B**

14.

Which FTK Imager format is NOT valid for forensic image export?

- A) E01
- B) AFF
- C) TXT
- D) RAW

☒ **Answer: C**

15.

Which tool offers live memory analysis of Windows systems?

- A) Volatility
- B) FTK Imager
- C) Process Monitor
- D) Sysinternals AutoRuns

☒ **Answer: A**

16.

The tool 'RAMMap' helps in:

- A) Editing files
- B) Viewing memory usage
- C) Analyzing hex dumps
- D) Cracking passwords

☒ **Answer: B**

17.

WinHex provides all of the following EXCEPT:

- A) Binary editing
- B) Hash calculation
- C) Registry recovery
- D) Advanced scripting

☒ **Answer: C**

18.

In FTK, a file signature mismatch indicates:

- A) Virus infection
- B) Metadata loss

- C) File extension does not match actual type
- D) RAM corruption

☒ **Answer: C**

19.

Which tool helps with viewing deleted browser history in OSF?

- A) URLView
- B) History Explorer
- C) WebCache Analyzer
- D) Browser Viewer

☒ **Answer: D**

20.

Which component of FTK is used for carving deleted files from unallocated space?

- A) Timeline viewer
- B) Data carving module
- C) Registry viewer
- D) Memory scanner

☒ **Answer: B**

21.

Sysinternals utilities are mainly used for:

- A) Offline disk imaging
- B) Live Windows forensics and diagnostics
- C) Linux analysis
- D) Malware removal

☒ **Answer: B**

22.

010 Editor differs from other hex editors because:

- A) It's slower
- B) It uses templates to parse structured formats
- C) It only edits text
- D) It cannot save files

☒ **Answer: B**

23.

A proper use of FTK Imager is to:

- A) Edit source code
- B) Format USB drives
- C) View and hash image content without altering evidence
- D) Overwrite disk sectors

☒ Answer: C

24.

What type of search is possible in FTK for keywords?

- A) Plain text only
- B) Regex and indexed search
- C) Audio only
- D) No search available

☒ Answer: B

25.

Which tool provides a GUI for email archive analysis?

- A) AutoRuns
- B) Process Explorer
- C) OSF Email Viewer
- D) PsExec

☒ Answer: C

26.

A major strength of Sysinternals Suite is that it's:

- A) Cloud-only
- B) For Linux
- C) Portable (no installation needed)
- D) Obsolete

☒ **Answer: C**

27.

When examining the binary of a suspicious executable, which tool is best?

- A) Task Manager
- B) HxD
- C) TCPView
- D) AutoRuns

☒ **Answer: B**

28.

The FTK Imager command-line version is useful for:

- A) GUI enhancement
- B) Memory leak fixing
- C) Automation and scripting
- D) Email decryption

☒ **Answer: C**

29.

Which tool would be used to inspect NTFS MFT records manually?

- A) AutoRuns
- B) Registry Viewer
- C) WinHex
- D) FTK Imager

☒ **Answer: C**

30.

One limitation of hex editors in forensics is that they:

- A) Do not support hashing
- B) Cannot analyze logical volumes easily
- C) Only work on FAT
- D) Require the internet

☒ **Answer: B**

☒ **10 Hard-Level MCQs**

31.

What is the advantage of a forensic image over a simple file copy?

- A) It saves space
- B) It copies only user files
- C) It includes deleted, hidden, and slack space data
- D) It compresses better

☒ **Answer: C**

32.

In FTK, which feature allows you to correlate evidence across multiple drives?

- A) Cross-drive link mapping
- B) Email parsing
- C) Registry diffing
- D) Shared object viewer

☒ **Answer: A**

33.

Why is it important that FTK Imager doesn't alter source media?

- A) Prevents encryption
- B) Ensures legal integrity of evidence
- C) Saves RAM
- D) Reduces imaging time

☒ Answer: B

34.

In a hex editor, what does 'magic number' typically refer to?

- A) Timestamp
- B) File signature in bytes
- C) User password
- D) Port number

☒ Answer: B

35.

If a process keeps restarting, which Sysinternals tool best helps analyze it?

- A) Autoruns
- B) PsExec
- C) Process Monitor
- D) DiskPart

☒ Answer: C

36.

What feature in OSF helps in visualizing file timestamps and access chronology?

- A) File Analyzer
- B) Registry Viewer
- C) Timeline Viewer
- D) Timestamp Comparator

☒ **Answer: C**

37.

WinHex offers disk cloning via:

- A) BitLocker integration
- B) Logical copy only
- C) Sector-level duplication
- D) Cloud sync

☒ **Answer: C**

38.

Which of the following cannot be detected via Autoruns?

- A) Scheduled tasks
- B) DLLs injected at startup
- C) Windows registry keys
- D) Wi-Fi signal history

☒ **Answer: D**

39.

Which of the following best describes the FTK index search feature?

- A) Searches only log files
- B) Builds a keyword index during case processing
- C) Compares files by content hash
- D) Decrypts registry hives

☒ **Answer: B**

40.

When analyzing ransomware binary byte-by-byte, the best suited tool is:

- A) Volatility
- B) HxD
- C) OSF Email Viewer
- D) FTK Imager

☒ **Answer: B**
