

Easy (10 questions)

1.

What does IOS stand for in Cisco devices?

- A) Internet Operating System
- B) Internetwork Operating System
- C) Internal Operating System
- D) Integrated Operating System

Answer: B

2.

Which Cisco device runs IOS?

- A) Router
- B) Switch
- C) Firewall
- D) All of the above

Answer: D

3.

Which IOS mode allows full router configuration?

- A) User EXEC
- B) Privileged EXEC
- C) Global Configuration
- D) Interface Configuration

Answer: C

4.

What prompt appears in privileged EXEC mode?

- A) Router>

- B) Router#
- C) Router(config)#
- D) Router(config-if)#

Answer: B

5.

What is SDM?

- A) Command line tool
- B) Web-based GUI tool for Cisco router management
- C) Firewall software
- D) Routing protocol

Answer: B

6.

SDM connects to the router over which protocol?

- A) FTP
- B) HTTP/HTTPS
- C) Telnet
- D) SSH

Answer: B

7.

What is the command to enable secret password?

- A) enable password
- B) enable secret
- C) secret password
- D) password enable

Answer: B

8.

Which of the following does SDM help configure?

- A) Routing protocols
- B) Security policies
- C) Firewall rules
- D) All of the above

Answer: D

9.

Which IOS command mode allows configuration of a specific interface?

- A) User EXEC
- B) Global Configuration
- C) Interface Configuration
- D) Privileged EXEC

Answer: C

10.

What is the advantage of SDM?

- A) CLI access only
- B) GUI simplifies configuration
- C) No need for authentication
- D) No monitoring capability

Answer: B

Medium (30 questions)

11.

How do you access privileged EXEC mode from user EXEC mode?

- A) enable
- B) configure
- C) exit
- D) start

Answer: A

12.

Which command enables SSH on a Cisco router?

- A) ip ssh enable
- B) crypto key generate rsa
- C) ssh start
- D) enable ssh

Answer: B

13.

What port does Cisco SDM use by default?

- A) 21
- B) 22
- C) 80/443
- D) 23

Answer: C

14.

Which command sets the hostname of the router?

- A) set hostname
- B) hostname
- C) router hostname

D) name router

Answer: B

15.

Which of the following is NOT a feature of IOS?

A) Routing

B) Switching

C) File storage

D) VPN support

Answer: C

16.

How does SDM communicate configuration changes to the router?

A) Direct hardware access

B) Converts GUI inputs to IOS commands

C) FTP upload

D) SNMP traps

Answer: B

17.

Which IOS mode is used to view router configuration but not change it?

A) User EXEC

B) Privileged EXEC

C) Global Config

D) Interface Config

Answer: B

18.

What command enables HTTP server on a router for SDM?

- A) ip http server
- B) service http
- C) enable http
- D) http enable

Answer: A

19.

What is AAA in IOS security?

- A) Authentication, Authorization, Accounting
- B) Automatic Access Authorization
- C) Advanced Access Algorithm
- D) Authentication and Authorization Agent

Answer: A

20.

Which command sets local username and password?

- A) username [name] password [pass]
- B) user add
- C) set user
- D) local user

Answer: A

21.

How can you save the running configuration in IOS?

- A) copy running-config startup-config
- B) save config
- C) write config
- D) store config

Answer: A

22.

Which command shows current configuration?

- A) show config
- B) show running-config
- C) show startup-config
- D) show interface

Answer: B

23.

Which command disables telnet and enables SSH on vty lines?

- A) transport input ssh
- B) no telnet
- C) enable ssh
- D) line ssh

Answer: A

24.

Which feature in SDM helps to audit router security?

- A) Security audit wizard
- B) Traffic monitor
- C) VPN manager
- D) Access list editor

Answer: A

25.

What type of routing protocols can be configured via IOS?

- A) Static
- B) Dynamic
- C) Both A and B

D) None

Answer: C

26.

What is the default mode when you login to Cisco router?

- A) User EXEC mode
- B) Privileged EXEC mode
- C) Global Configuration mode
- D) Interface Configuration mode

Answer: A

27.

What command is used to exit configuration mode?

- A) exit
- B) quit
- C) end
- D) Both A and C

Answer: D

28.

What does the command show ip interface brief display?

- A) Routing table
- B) IP addresses and status of interfaces
- C) ARP table
- D) VLAN information

Answer: B

29.

Which IOS file stores the router configuration?

- A) running-config
- B) startup-config
- C) flash-config
- D) sys-config

Answer: B

30.

Which IOS feature manages traffic filtering?

- A) NAT
- B) ACL
- C) VPN
- D) DHCP

Answer: B

31.

Which IOS command enters global configuration mode?

- A) configure terminal
- B) enable
- C) config
- D) setup

Answer: A

32.

Which IOS feature allows network address translation?

- A) NAT
- B) ACL
- C) QoS
- D) DHCP

Answer: A

33.

What is the role of the Cisco IOS CLI?

- A) Allows configuration and monitoring of the device
- B) Stores firmware
- C) Acts as a web server
- D) Encrypts traffic

Answer: A

34.

Which command would you use to test network connectivity?

- A) ping
- B) test
- C) connect
- D) trace

Answer: A

35.

How can you secure console access to the router?

- A) Set a console password
- B) Disable console port
- C) Use SSH on console
- D) Enable Telnet

Answer: A

Hard (10 questions)

36.

How can you restrict SSH access to only certain IP addresses on IOS?

- A) Using an ACL applied to vty lines
- B) Using NAT rules
- C) Setting username restrictions
- D) Configuring port security

Answer: A

37.

Which IOS command sequence correctly enables SSH version 2?

- A)

arduino

CopyEdit

Router(config)# ip ssh version 2 Router(config)# crypto key generate rsa

B)

arduino

CopyEdit

Router(config)# ip ssh enable v2

C)

arduino

CopyEdit

Router(config)# ssh enable version 2

D)

arduino

CopyEdit

Router(config)# enable ssh 2

Answer: A

38.

What SDM feature allows you to create complex firewall policies visually?

- A) Access Rules Wizard
- B) VPN Wizard
- C) Routing Wizard
- D) Interface Manager

Answer: A

39.

How does IOS implement secure password storage?

- A) Plain text
- B) MD5 hash (enable secret)
- C) Base64 encoding
- D) AES encryption by default

Answer: B

40.

Which IOS command displays the SSH server status?

- A) show ip ssh
- B) show ssh
- C) show running-config ssh

D) show crypto ssh

Answer: A

41.

What is the purpose of the logging buffered command in IOS?

A) Stores logs in RAM buffer

B) Sends logs to a remote server

C) Disables logging

D) Writes logs to flash memory

Answer: A

42.

Which SDM tool helps to troubleshoot network issues?

A) Troubleshooting wizard

B) Security audit

C) VPN manager

D) Configuration backup

Answer: A

43.

What IOS command disables HTTP server (disabling SDM access)?

A) no ip http server

B) disable http

C) ip http disable

D) no http

Answer: A

44.

Which IOS feature can enforce different user privileges?

- A) AAA
 - B) NAT
 - C) QoS
 - D) DHCP
- Answer: A**

45.

What is the maximum number of simultaneous SSH sessions on a Cisco IOS router by default?

- A) 1
- B) 5
- C) 10
- D) 15

Answer: B
